

AKKALA VENKATA SAI KRISHNA

Bangalore, India • +91 9676295867 • Gmail: saikrishnaakkala9@gmail.com • [Linkedin](#) • [GitHub](#) • [Portfolio](#)

PROFESSIONAL SUMMARY

Data and AI professional skilled in Excel, Power BI, Tableau, SQL, and modern AI technologies including LLMs, RAG architectures, and AWS. Transforms complex data into actionable insights and builds intelligent solutions that drive informed decision-making.

TECHNICAL SKILLS

- | | |
|----------------------|----------------------|
| • Python | • SQL |
| • Power BI | • LLMs |
| • Agentic AI | • RAG |
| • AWS | • Prompt Engineering |
| • Data Analysis | • Data Modeling |
| • Data Visualization | • EDA |

PROFESSIONAL EXPERIENCE

AI Intern | Hitachi Digital Services | Bangalore | Jan 2025 – Present

Project: Multimodal RAG Chatbot (Client: Japan Car Company)

- Built a Multimodal RAG pipeline using LangChain and Amazon Bedrock, reducing manual document search time by ~60%
- Implemented semantic search with Amazon OpenSearch, indexing 10,000+ document chunks for near-instant retrieval
- Optimized prompt design and embedding parameters (chunk size, overlap), boosting retrieval accuracy by ~35% and reducing hallucinations
- Deployed scalable AI backend on AWS EC2 with REST APIs and custom evaluation suites for production-grade query handling

PROJECTS

AI-Powered Automated Pull Request Review System | Python | Agentic AI | Java Script | [Link](#)

- Built a multi-agent system that automatically analyzes pull requests and posts contextual code reviews, reducing manual review effort significantly
- Implemented repo-aware knowledge retrieval so agents understand codebase patterns, standards, and history before generating review feedback
- Enabled automated code suggestions within PR comments, helping developers fix issues directly from the review itself
- Orchestrated multiple AI agents for task-specific roles (code quality analysis, security checking, performance analysis) to deliver comprehensive, actionable PR reviews

Data Warehouse | Python | SQL | ETL | Star Schema | Power BI | [Link](#)

- Designed end-to-end ETL pipeline ingesting CRM and ERP datasets; applied transformation logic and data quality checks, enabling 3x faster reporting queries
- Modeled Star Schema with optimized fact and dimension tables for sales trend analysis, customer segmentation, and operations reporting
- Integrated with Power BI and Tableau for self-service analytics dashboards, reducing time-to-insight for business stakeholders.

Automated EDA & Data Analysis Platform | Python | Streamlit | Pandas | SQL Server | [Link](#)

- Built a Streamlit web application for CSV and SQL Server data ingestion, automated EDA, and statistical profiling—reducing analyst data prep time by ~50%.
- Implemented automated data cleaning, outlier detection, and dynamic Matplotlib/Seaborn visualizations with interactive filtering.
- Enabled non-technical users to perform exploratory analysis on datasets up to 500K rows with responsive chart rendering.

ACHIEVEMENT

- Silver Medal – Awarded with silver medal for academic excellence

EDUCATION

B.Tech — Data Science | Santhiram Engineering College (JNTUA) CGPA: 8.49 | Aug 2021 – Apr 2025

CERTIFICATIONS

- Advanced Prompt Engineering Techniques----- LinkedIn
- Data Analyst Certification----- ExcelR, Bangalore (Nov 2025)
- Data Analysis with Python ---- IBM (Nov 2024)
